The Journal of Philosophy, Psychology and Scientific Methods

Beginning with January 7, 1904, The Science Press is publishing a fortnightly journal devoted to *philosophy, psychology and scientific methods*, edited by Professor Frederick J. E. Woodbridge, Columbia University, with the cooperation of a number of American students of philosophy and psychology. The journal will be conducted on the lines of the German 'Centralblatt' containing short articles, preliminary reports, discussions, abstracts, reviews and notes. There is no similar journal in the field of scientific philosophy, and it is hoped that its establishment, permitting the quick publication of shorter contributions, prompt reviews of the literature and timely discussion, will add to the interest and productiveness in philosophical and psychological subjects. The journal will be essential to all students of philosophy, psychology and the principles of science, and should be accessible in all libraries. The subscription price is three dollars annually (twenty-six numbers) and the cost of single numbers is fifteen cents.
